

Flip it Superficial?   
 I S 8 +   
 20 I + can't   
 maybe particle Attachment points in universe medium   
 Gluons? sub-sub parts?   
 second hand look like?   
 what the info were?

electron

why "matter" instead of anti-matter?   
 "COS" (T<sub>PL</sub>) + C?   
 "SIN" (T<sub>PL</sub>) + C? where on the Grav functions us?   
 Gravitational ripples how many in   
 Highest Gravity at zero so universe "Fiber" strings   
 put?   
 "Laws"?

vested Gravities?

- masses of - Particles
- of masses of - Atoms
- of masses of - Planets
- of masses of - Stars
- of masses of - Systems
- of masses of - Galaxies
- of local Groups

Gravity might be cooler than ever imagined.

$$f(I) = \frac{1}{PL} \quad f(S) = PL^2 \quad f(P) = PL \quad f(T) = +$$
