

"Homemade" Electrons  
 Pingpong ball  
 "skin" Acts AS SNF  
 magnets are WNF

proton  
 ring/clump of electrons  
 smushed together

neutron  
 ring/clump of electrons  
 smushed together with different  
 orientation

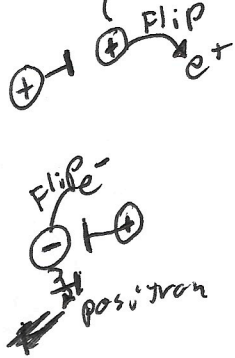

radiation  
 electron capture  
 neutron

Beta decay

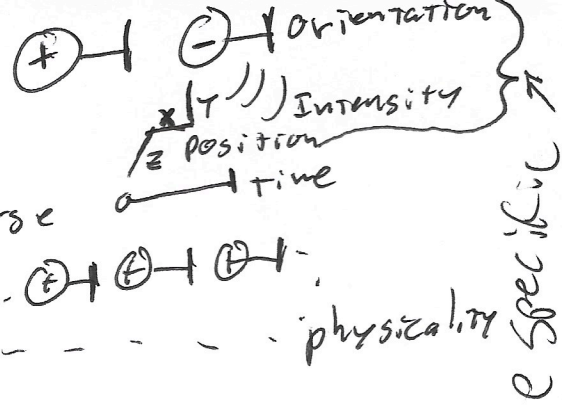

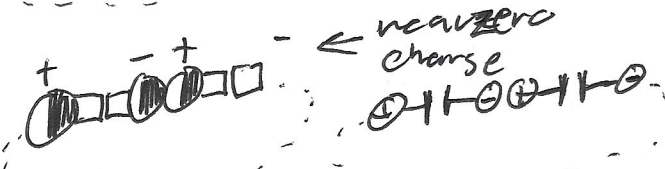

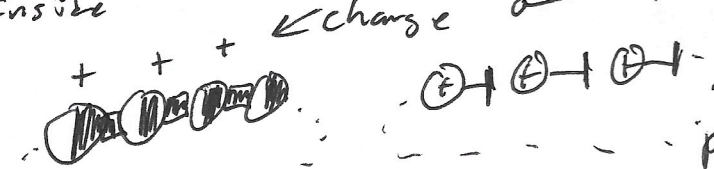

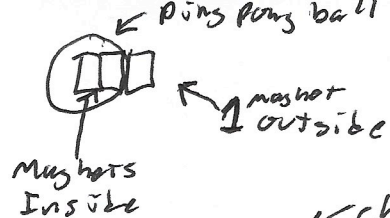

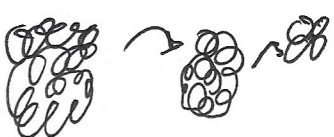

neutron

proton

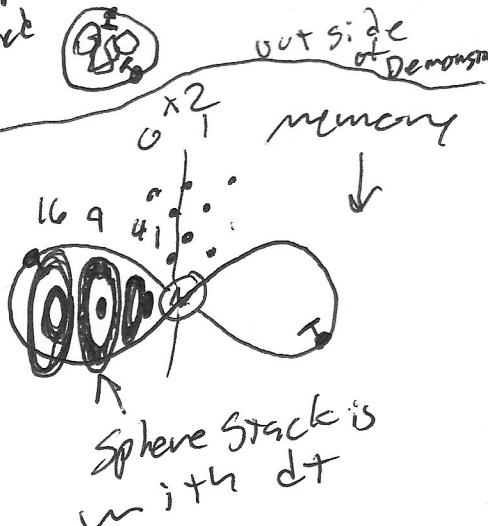

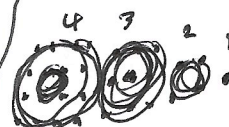

Alpha decay

clump just  
 falls apart?  
 "binds" energy  
 cooses strength  
 with "Large" distance?  
 does "g" matter this  
 small?

nucleus?  
 interlocked p/n?  
 wrapped/clump tumblings?

Assumptions derived  
 A to m

e can exist in  
 "same" orbit in diff  
 "phase"/orientation/charge?  
 $2n^2$ ?  $3^+$ ?

Antineutrino  
 Flip e-  
 positron

perpervality

physicality  
 e specific
