

electrons as Grain

T : Time, Constant $|T_e - T_s| = dt$ duration, length, event, experience...
 e^+ : electron, physicality, matter
 I : Intensity, value, $0 \rightarrow 1$ di/dt
 P : Position $0 \rightarrow 1$ $dx/dt, dy/dt, dz/dt$
 S : Spin, Orientation $0 \rightarrow 1$ ds/dt
 G : Gravity, Quantity $3/4d$ cd/dt ds/dt

$\left. \begin{array}{l} di/dt \\ ds/dt \end{array} \right\} \begin{array}{l} 3d \text{ point} \\ \text{In 4d Space/Time} \end{array}$

e^+ become the "grain" of the universe.
 G acts like the sea the e^+ gold fish swim about in.
