

Our universe isn't a bazillion Plancks.
It's one plank, and our human experience is at a different Plank Scale

~~4/10/9~~ $\frac{1 \text{ v}}{14 \text{ byears}} \cdot \frac{12,000 \text{ years}}{1 \text{ human Year}} = 1 \text{ human History Plank}$

$\cdot \frac{80 \text{ years}}{1 \text{ human Plan}} = 1 \text{ Human Plan}$

$\cdot \frac{1 \text{ year}}{1 \text{ year-plank}} = 1 \text{ year-plank}$

Our math is Backwards.

~~4/10/9~~ $0 < \mathbb{R} < 1$. Powersets of

Discrete numbers (Abstract Ideas) can only organize ~~the~~ continuous Information.
It cannot ^{fully contain} ~~explain~~ it.

Question about Plank length?
